## INTRODUCTION

Grant Agreement Preparation Forms (GPF's) have been designed to facilitate the project negotiations and the production of the grant agreement. It is a main communication instruments between the co-ordinator representing the Consortium and the Commission's Project Officer. Essentially the forms are used to identify the beneficiaries that will sign/accede to the grant agreement, to determine the eligible costs and Community contribution and to electronically capture structured information on work packages, efforts, milestones and deliverables. The forms also include a standard declaration to be signed by each participating organisation.

To assist the filling in of the GPF's the following is made available:

- Annotations – these are attached to the standard forms and should be read carefully
- Pre-filled legal information (see below)
- NEF – NEF is an online tool to be used by the co-ordinator and the beneficiaries to edit the content of the GPF's

Legal information is held in the A2.1 form. This information is pre-filled by the Commission services using either information taken from the Commission database or from the proposal. Depending on the validity of this information, the organisation concerned may have to supply to the Commission with a so called "identification fiche" and supporting legal documents. For instructions on this, see the annotations to the A2.1 form.

The budget table (A3.2) is to be used in Part A of Annex I of the grant agreement.

**GENERAL INFORMATION**

Project title <sup>3</sup>	Identification and validation of new breast cancer biomarkers based on integrated metabolomics		
Starting date <sup>4</sup>	The first day of the month after the signature by the Commission

Call (part) identifier <sup>6</sup>	FP7-HEALTH-2007-A		
Activity code(s) most relevant to your topic <sup>7</sup>	HEALTH-2007-2.4.1-2: Translating clinical #omics#-technology (genomics, proteomics, metabolomics) into innovative cancer biomarkers aiding in early diagnosis, prognosis and treatment selection of cancer patients		
Free keywords <sup>8</sup>	Breast cancer; Metabolomics; Biomarker		
Abstract <sup>9</sup> (max. 2000 char.)			
<p>Breast cancer is the most common cancer in women. It is therefore in the focus of approaches for the identification of predictive molecular biomarkers. In contrast to transcriptomics, the changes in metabolite levels that are associated with tumor development and progression have not been investigated to a great extent, so far. Metabolomics is defined as the study of all metabolites in a cell, tissue or organism, and the metabolome is regarded as the amplified output of a biological system. The originality of the METAcancer approach will be the first-time application of combined technologies for metabolic profiling to large-scale analysis of patient samples in the field of translational research in breast cancer. We will test the hypothesis that alterations in the level of metabolites can be used for a molecular classification of breast cancer and for identification of new prognostic and predictive biomarkers. Our project is based on a large tumor biobank as well as on previous investigations of the consortium partners. We will use three different metabolic profiling technologies (GC-MS, NMR and LC-MS) to maximize the coverage of the breast cancer metabolome and apply advanced strategies for identification of individual metabolites. METAcancer's integrated data-mining approach combines metabolomic data gained under the project with existing transcriptomic data pools for bioinformatic interpretation of cellular networks. By this strategy we will be able to go beyond the metabolite level and to identify and validate selected protein and mRNA biomarkers relevant for metabolic alterations. This will result in a combined signature consisting of metabolites as well as key protein and mRNA markers as a basis for a validated diagnostic system to assess prognosis and to guide targeted therapies in breast cancer.</p>

## **32. SME**

SME means micro, small and medium sized enterprise within the meaning of Recommendation 2003/361/EC in the version of 6 May 2003 (see [http://ec.europa.eu/enterprise/enterprise\\_policy/sme\\_definition/index\\_en.htm](http://ec.europa.eu/enterprise/enterprise_policy/sme_definition/index_en.htm)).

An enterprise is considered as an SME, taking into account its partner enterprises and/or linked enterprises (please see the above mentioned recommendation for an explanation of these notions and their impact on the definition), if it:

- employs fewer than 250 persons
- has an annual turnover not exceeding EUR 50 million, and/or
- an annual balance sheet total not exceeding EUR 43 million
- is autonomous

The headcount corresponds to the number of annual work units (AWU), i.e. the number of persons who worked full-time within the enterprise in question or on its behalf during the entire reference year under consideration. The work of persons who have not worked the full year, the work of those who have worked part-time, regardless of duration, and the work of seasonal workers are counted as fractions of AWU. The staff consists of:

- employees;
- persons working for the enterprise being subordinated to it and deemed to be employees under national law;
- owner-managers;
- is autonomous

partners engaging in a regular activity in the enterprise and benefiting from financial advantages from the enterprise.

ATTENTION: Apprentices or students engaged in vocational training with an apprenticeship or vocational training contract can not be included as staff. The duration of maternity or parental leaves is also not counted.

The data to apply to the financial amounts (e.g. turnover and balance sheet), as well as to the headcount of staff, are those relating to the latest approved accounting period and calculated on an annual basis. They are taken into account from the date of closure of the accounts. The amount selected for the turnover is calculated excluding value added tax (VAT) and other indirect taxes.

In the case of newly-established enterprises whose accounts have not yet been approved, the data to apply is to be derived from a bona fide estimate made in the course of the financial year. These organisations must insert "N/A" for the two questions relating to the duration and the closing date of their last approved accounting period.

### **40. Funding % for RTD/Innovation activities**

However, for beneficiaries that are non-profit public bodies, secondary and higher education establishments, research organisations and SMEs, the rate may reach a maximum of 75% of the total eligible costs. If these beneficiaries change their status during the life of the project, this reimbursement rate shall be applicable up to the moment they lose their status.

### **41. Indirect costs**

Indirect costs are all those eligible costs which cannot be identified by the beneficiary as being directly attributed to the project, but which can be identified and justified by its accounting system as being incurred in direct relationship with the eligible direct costs attributed to the project. They may not include any eligible costs.

### **42. Actual indirect costs**

Beneficiaries who have an analytical accounting system to identify their indirect costs are allowed to claim actual indirect costs.

### **43. Simplified method**

If it is in accordance with its usual accounting and management principles and practices, a beneficiary is allowed to use a simplified method of calculation of its full indirect eligible cost at the level of its legal entity. Use of such a method is only acceptable where the lack of analytical accounting or the legal requirement to use a form of cash-based accounting prevents detailed cost allocation. The simplified approach must be based on actual costs derived from the financial accounts of the period in question.

### **44. Standard flat rate**

A beneficiary may opt for a flat rate of 20% of its total eligible costs excluding the costs for subcontracting and the costs of reimbursement of resources made available by third parties that are not used on the premises of the beneficiary

#### **45. Special transitional flat rate**

Non-profit public bodies, secondary and higher education establishments, and research organisations and SMEs, which are – due to the lack of analytical accounting – unable to identify with certainty their real indirect costs for the project, when participating in funding schemes which include research and technological development and demonstration activities, as referred to in the table of Article II.16 of the grant agreement, may opt for a flat-rate of 60% of the total direct eligible costs excluding costs for subcontracting and the costs of reimbursement of resources made available by third parties which are not used on the premises of the beneficiary. If these beneficiaries change their status during the life of the project, this flat rate shall be applicable up to the moment they lose their status.

#### **46. ICPC**

If you are participating from an International Cooperation Partner Country (ICPC), you can opt for lump sum funding instead of reimbursement of eligible costs.

#### **47. Funding % for Coordination/Support activities**

The Community financial contribution may reach a maximum of 100% of the total eligible costs.

#### **48. Maximum reimbursement of indirect costs**

In the case of coordination and support actions, reimbursement of indirect eligible costs for every beneficiary may reach a maximum of 7% of the direct eligible costs, excluding the direct eligible costs for subcontracting and the costs of reimbursement of resources made available by third parties which are not used on the premises of the beneficiary.

#### **49. Funding % for RTD**

For research and technological development activities, the Community financial contribution may reach a maximum of 50% of the total eligible costs.

However, for beneficiaries that are non-profit public bodies, secondary and higher education establishments, research organisations and SMEs, the rate may reach a maximum of 75% of the total eligible costs. If these beneficiaries change their status during the life of the project, this reimbursement rate shall be applicable up to the moment they lose their status.
